3 · Support period determination

The support period determination records how long the manufacturer will handle vulnerabilities for a product, and why. Art 13(8) requires at least five years unless the product is expected to be in use for less, and Annex VII pt 4 requires the information used to set it. Complete it before placing on the market and file it with the technical documentation.

At a glance

Item	Detail
Legal basis	Art 13(8); Art 13(9)-(11); Art 13(19); Annex VII pt 4; Annex II pt 7
Needed for	Annex VII pt 4; the end date shown at purchase; the period over which Annex I Part II applies
Owner	Product manager
Approver	Compliance lead, with legal counsel
When to create	At design, once intended purpose and expected time in use are agreed (Template 1, Template 2)
When to update	For each new variant and each substantially modified version; when expected-use evidence changes
Retention	10 years after placing or the support period, whichever is longer (Art 13(13))
Feeds	Template 4 (Annex VII pt 4); Template 6 (Annex II pt 7 end date); Template 2 (expected time in use); Template 9 (supplier support commitments)

How to complete

1. State the expected time in use from Template 1 and Template 2.
2. Gather evidence for each Art 13(8) factor and enter it in the evidence table.
3. Set the period. Treat five years as a floor, not a default (guidance paras 125-128).
4. Convert the period to an end month and year per variant and, for software, per substantially modified version.

5. Record how the end date is shown at purchase and how users are told when support ends.
6. Enter each version in the version-support register and obtain sign-off.

Template

Part A: determination

Field	What to enter	Basis	Example: L2 Smart Lock (illustrative)
Determination ID and version	[SP-ID], [version], [date]	Annex VII pt 4	SP-L2-01 v1.0, 31 Oct 2026
Product and variants	[Family, variants, SKUs; Template 1 reference]	Art 13(8)	L2 Smart Lock, 3 SKUs; CR-L2-01
Expected time in use	[Years and the reason]	Art 13(8)	10 years: a door lock stays fitted until the door or owner changes
Reasonable user expectations	[What buyers expect, with evidence]	Art 13(8)	Buyers expect a lock to outlast a phone; see evidence table
Nature of the product	[Hardware, software or both; long-lived category?]	Art 13(8); recital 60	Hardware with firmware, app and cloud; physical security function
Relevant Union law	[Other acts setting lifetimes or duties]	Art 13(8)	[None identified]
Shorter than five years?	[Only if expected use is shorter; give the evidence]	Art 13(8)	No
Declared support period	[Years]	Art 13(8)	10 years
End month and year	[Per variant, or per batch for hardware placed unit by unit]	Art 13(19); Annex II pt 7	First batch placed under the CRA [Dec 2027]: end [Dec 2037]

Field	What to enter	Basis	Example: L2 Smart Lock (illustrative)
Update availability	[Each update kept available 10 years or the rest of the period, whichever is longer]	Art 13(9)	Signed-artefact repository budgeted for 10 years after last release
Latest-version-only patching	[Yes or no; free upgrade path without added hardware or software cost]	Art 13(10)	No; all firmware versions in support receive fixes
Archives of old versions	[Public archive with risk warnings, if offered]	Art 13(11)	Archive page with warning text
Sign-off	[Name], [role], [date]	Governance	[Name], Product manager; [Name], Compliance lead

The Art 13(8) factors follow the order of the OJ text: expected time in use, reasonable user expectations, nature of the product, relevant Union law; the rest are optional. No delegated act on minimum periods exists as of 30 Oct 2026.

Part B: expected-use evidence

Evidence source	What it shows	Factor	Example: L2 Smart Lock (illustrative)
Installed-base and field data	Age of units still connected	Expected time in use	[% of earlier-generation locks active after 7 years]
Warranty, returns and replacement data	When users replace the product	Expected time in use	[Median replacement age]
Comparable products	Periods declared for similar products by other manufacturers	Optional factor (Art 13(8)); also informs reasonable user expectations	[Competitor periods, with source]
Customer research and complaints	What buyers assume about support	Reasonable user expectations	[Survey reference]

Evidence source	What it shows	Factor	Example: L2 Smart Lock (illustrative)
Product category	Whether the category is typically used for longer	Nature of the product; recital 60	Long-lived home hardware
Supplier support commitments	Whether chipset, OS and library support covers the period; availability of the operating environment	Optional factors (Art 13(8)): support periods of integrated core components; availability of the operating environment	[BLE stack and MCU vendor commitments; Template 9]
Other Union law	Lifetimes or duties set elsewhere	Relevant Union law	[None identified]

Part C: decision and publication

Field	What to enter	Basis
Where shown at purchase	[Product, packaging or digital means; retail listing]	Art 13(19)
Annex II entry	[Annex II pt 7 text and URL; Template 6]	Annex II pt 7
End-of-support notice	[In-product or in-app notice where technically feasible; content: date, risk of continued use, upgrade path]	Art 13(19)
Annex VII filing	[Location of this record in the technical documentation; Template 4]	Annex VII pt 4

Part D: version-support register

Each substantially modified version carries its own declared period. A modification does not reset or extend an existing period (guidance paras 132-135). For standalone software, the product is placed at its first offering; later versions keep that placing date unless they are a substantial modification (guidance paras 13-15, Example 2). Record every version and whether it is a new placing.

Version	New placing?	Placing date	Declared end (month, year)	Shown at purchase	Update channel	Migration path	Legacy-version owner
L2 firmware [x.y] (illustrative)	Yes (first placing)	[Dec 2027]	[Dec 2037]	Packaging and app store listing	Automatic OTA	Free OTA to latest	Product manager, HBS
[Version]	[Yes/No]	[Date]	[Month, year]	[Where]	[Channel]	[Path]	[Role]

Common mistakes

- Declaring five years by default. It "operates only as a safeguard" and is not the default (guidance paras 125-128).
- No version record for software, so nobody knows which versions get fixes or which are new placings. Keep the version-support register.
- Showing a duration instead of an end date. Art 13(19) requires at least the month and the year at purchase.
- Assuming a substantial modification extends the period for earlier versions. It does not (paras 132-135).
- Setting a period that component suppliers cannot support. Secure supplier commitments first (Template 9).

Template 3 · v1.0 · 31 Oct 2026 · Not legal advice; confirm wording against the Official Journal text before use.
